

Caring for your furniture

FABRIC UPHOLSTERY

With the right care you can prolong the life of your upholstered furniture. It is useful to have a regular maintenance routine and we can also help recommend specific cleaners and care packs for your fabric sofa or chair.

Cushions and Interiors

Rotate and plump loose cushions to avoid uneven wear and maintain their appearance. Reversible seat cushions should be turned weekly. You may have a favourite spot on your sofa but try and use every seat regularly to ensure even wear.

It is normal for seat interiors to lose around 10% of their density during the first 3 months. Ensuring that you regularly dress your cushions will ensure you get maximum performance from your furniture.

Top Tips for keeping your new furniture in tip-top condition

- ✓ Vacuum regularly to remove any dust and loose debris.
- ✗ Do not use abrasive cleaners or detergents.
- ✗ Do not allow body / hair grease and oil to build up.
- ✓ In the event of a spillage do not rub into the fabric as this can cause staining. Use absorbent paper towels to raise from the fabric and then dab the area lightly with clean towels.
- ✗ Do not place your sofa in direct sunlight as this may cause colour fading.

- ✓ If you have loose covers make sure that all covers are cleaned at the same time to prevent colour variations. Follow the manufacturers washing instructions.
- ✗ Do not place your furniture too close to direct heat sources. Sofas and chairs should be at least 50cm away as heat can damage the upholstery.
- ✗ Try to avoid sitting on the edge of cushions or sofa and chair arms as it can cause damage to the frame.
- ✗ Beware of sharp objects that could scratch or tear upholstery.

We are here to help. If you have a question or a problem, please call or email us. We can also advise you on our Care Plan and the best products to clean your furniture.

Our Care Plan

Providing you peace of mind to enjoy your new furniture for years to come.
